# THE HEART AND SOUL OF THE IDEAL SADDLE.

The heart of the Ideal Saddle, a WRS saddle tree, has been fashioned through exhaustive research and development, being designed and tested by some of the world's elite riders, thus provides an exceptional fit on the horse.

All trees are manufactured from birch wood laminate veneers in a unique 3D jigsaw method; clamped together and then oven cured for superior strength.

The more open arch gives good clearance on the horse's withers. The points are specifically designed so as not to impede the horse's shoulder movements. The angle of the side bars allows for a narrower twist, enabling the rider to achieve a closer leg position to the horse.

The bars are also anatomically constructed to follow the contours of the horses back.

***All our trees are manufactured to surpass the latest British Standard BS 6635:2015***

If the tree is the heart of a saddle then the leather is its soul. Ideal knows more than a little about leather and is expert in sourcing the finest materials for its products to ensure every item of saddlery is made from the most appropriate leather of the highest quality.
